

You Asked, We Listened

Same Collectramatic Controller Now with 20 Channels and Removable Menu Strip

What's different?

- The 8000R offers 20 programmable channels, 12 more than the 8000C, providing greater flexibility for regional favorites and limited-time offers.
- It also has a removable menu strip for easy channel name updates, so you can label channels clearly.
- The fryer drain alarm is now integrated into the controller, maintaining its function to prevent smoke or fire from dry element events, without the large red button on the front.

What's the same?

- The same Standard Operating Procedure, encompassing daily utilization and programming protocols with which you are already familiar, and yes it still cooks the same.

Approved for

Do you want to upgrade your 8-channel Collectramatic to a 20-channel?

Ask us about the conversion kit!

The Winston 8000R is an upgraded version of the Winston 8000C controller used on Pressure Fryers (PF56, PF46), Low Pressure Fryers (LP56, LP46), and Open Fryers (OF59, OF49)
